DIARY NOTES

DD/S

31 July 1970

25X1A [] Today I had a chance to talk to []
25X1A of DD/I who was speaking of some of the accomplishments in the Records
25X1A Management program. [] spoke most highly of [] a
25X1A DD/S officer who has developed a very good system for the inventory of
25X1A records and has proved himself to be a most imaginative records manage-
25X1A ment officer. [] is very professional,
25X1A imaginative and could be very useful to any Directorate on an assignment
25X1A basis where he could bring all of his imaginative talents to bear on a records
25X1A program in a Directorate. He felt that [] various talents could be put
25X1A to best use where he would have a relatively free hand in proposing and
25X1A exploiting his ideas. I told [] that I was most pleased to hear
25X1A this about a DD/S officer and I would bring this to the attention of the
25X1A appropriate people for consideration of an assignment of this nature.

2. Accident in the Cooling Tower Air Conditioning System: About 1:30 a.m. 27 July one of the four fans in the cooling tower next to the power house broke causing an imbalance in the fan oscillation which caused the fan to tear loose and destroy both the fan and the fan supports. As soon as the accident was noted the other three fans were immediately shut down to assess the damage. Necessary assistance from GSA, Value Engineering and Logistics Services Division were called in and worked the remaining part of that night.

~~SECRET~~

~~SECRET~~

It was discovered that the accident was caused by fractures in the metal and metal fatigue in the fan hubs. Similar conditions were noted in the other fans and in view of the possible dangers these fans were not reactivated. Immediate action was initiated to structurally strengthen the remaining three fans to preclude any metal breakage and the supporting base for the fans was reinforced with redwood timbers. Meantime orders were dispatched to acquire a fan similar to the one that had been destroyed and such a fan was found in the warehouse of a Cincinnati company. Arrangements were made for its air shipment to Langley through GSA facilities. Logistics Services, GSA and other technical assistance was employed through out the night of 27 July and the early morning of 28 July. Number one fan was activated on the morning of the 28th and by 2 o'clock the other two fans were in operation. The cooling tower at this point was working at a little less than 75 percent capacity. By the early evening of 28 July the building began to cool down and by the morning of 29 July the building was quite comfortable for working purposes.

With the cutting off of the air conditioning on 27 July orders were placed through the Director of Personnel that employees could be excused when the temperature and humidity reached unacceptable levels. Very few employees departed during the day but as the temperature and humidity increased at the end of the day a number of employees left an hour or so early. Activation of the emergency generators and emergency air conditioning for OCS, RID, Signal Center, Operations Center and CRS permitted those facilities to continue with little or no delay in their operations.

The response of Logistics Services Division and GSA was outstanding, and the restoration of the air conditioning was completed through extraordinary effort and with a minimum delay. The Director and staff were fully informed of developments and everyone concerned was most sympathetic to the problem. Everyone was equally pleased at the quick response in solving the issue. The new fan for the fourth tower operation arrived by air on 29 July and hopefully this will be in operation Friday evening or Saturday.

[redacted] - PFIAB: John Bross called today concerning an Agency nomination of a deputy to Jerry Burke who is the new Secretary to the PFIAB. Burke is replacing Pat Coyne who will be given a position somewhere else in the Government. [redacted] name had been mentioned among others as one who could serve in this position and I talked to Don about this possibility. I advised Don he was completely free to consider this and while I would like him to remain on the Staff and in the DD/S I would support him fully if he showed interest in this other job. Don indicated he would like to know more about the job and I so informed John Bross. I gather that Don is probably one of about 10 who are being so considered and the next action is with John Bross or [redacted]

24 July 1970

25X1A Communications Briefing: At the Executive Committee Meeting today Jack Maury mentioned that Senator Goldwater expressed interest in having a briefing at some convenient future time on our world-wide communications operation. [REDACTED] turned to me and also asked for a briefing of the Office of National Estimates Board on a similar briefing of the Communications network. I passed both of these requests to 25X1A [REDACTED] and a date has been established in early August for the ONE briefing. Jack Maury will advise sometime in the future when the Goldwater briefing can be accomplished.

DD/S

22 July 1970

1. Problem Solving Seminar No. 5: On this date I was briefed by the Seminar group and found their report and their briefing most excellent. It was a well thought out series of recommendations and I am prepared to adopt all of them. I asked the group if they would be willing to remain in being to assist me, through [redacted] in implementing the recommendations. [redacted] have outlined to [redacted] a number of things to be done in implementing this program. I feel that the report of this Seminar group represents a real step forward in some of our problems.

25X1A

2. [redacted] In reference to this case on which there is other correspondence, I briefed [redacted] Personnel who is departing the morning of 23 July for [redacted] to obtain a Secrecy Agreement and make a final separation payment to [redacted] I explained to [redacted] that this had to be posed as a strict Personnel action without any connotation of Security or other matters and we'd need a standard Secrecy Agreement signed and completed before payment. Failure for any reason on [redacted] part to sign the Secrecy Agreement would cause us to withhold payment.

1. [] - Appeal to DCI on Financial Loss: On this

25X1A

date [] John Warner, and the DD/S met with the Executive Director to discuss this case which was the subject of a memorandum from the Acting IG to the Director dated 16 July 1970. It was agreed that the adverse finding on his loss claim was warranted, however, the Director's signature on the paper denying this claim needed to be changed to better reflect that this was a personal loss on the part of the individual and not a loss of Agency funds per se.

25X1A

[] es of Information for Federal
It has been proposed that this book be made available to Charles Rogovin, Law Enforcement Assistance Administration, Department of Justice, for publication in an unclassified form for eventual distribution to Municipal and State law enforcement authorities. All references to CIA would be deleted from the book by this agreement. The Director had some reservations but he was assured that this was an investigator's handbook and not a law enforcement handbook. Additionally, in our letter to Rogovin we should make more certain that any reference to the Agency is deleted and that this issuance would be clearly under the authority of the Department of Justice with no attribution to CIA.

25X1A 4. [] - Request for Separation Pay: This is an old case which suddenly came to life when [] now located in San Francisco asked if our offer to him of separation pay in 1960-61 was still available as he was in serious financial straits. After reviewing the records with Howard Osborn, John Warner, and coordinating with Jim Angleton, CI Staff, we felt that payment of separation pay even at this time would be warranted. We had authorized it in 1960-61 but [] did not accept it at the time. On 20 July we took the matter up with the Executive Director (DD/S, Howard Osborn and John Warner). The Executive Director concurred and checked it with the Director who also concurred. I have asked Bob Wattles to have a Personnel representative go to California to make the settlement which is to appear as a purely Personnel action not related to Security or other factors. I have asked Finance to expedite the preparation of the check and I will brief the Personnel representative prior to his departure from Washington.

DIARY NOTES

DD/S

21 July 1970

*Research and Development Program - FY '73 - FY '76: On this date a meeting of the Deputies with Carl Duckett was held concerning the R&D program for the above referenced years. Duckett proposed that we take a broad look at R&D needs and he discussed most of the topics set forth in the 17 July 1970 memorandum from [redacted] It was generally agreed that the R&D working group under [redacted] would continue to meet and explore this problem and then report back for another meeting of the Deputies. At times it was a bit hard to see where the R&D follow on or spill out would occur from some of the topics discussed and the approach to the larger problem which commentary had little substance and very little guidance; I felt that there was an insufficient sense of organization in approaching the problem. I suggested that on some of the topics that appeared worthy of further exploration that we should adopt a procedure which would permit us to more readily assess what we are doing now, what other activities within the Agency are related to a given topic and by putting them all together we could assess our program techniques, capabilities and facilities committed to that particular program. We could then determine that on which we need to have more guidance or information which might well become an R&D topic; at the same time we should consider from a policy standpoint whether this further development is really necessary and whether we would use it even if we had it. I used as examples technical methods of personnel selection and pointing out that we have a rather active personnel selection program and all the assets and techniques can be identified as to the make up of the present program. On the other hand we have ORD/DD/S&T conducting various studies on human behavior but we are not knowledgeable of the substance of these studies, we have no idea whether or not they apply to personnel selection and there would be a moot question in many instances whether these techniques would be used by us under any circumstances in personnel selection. Certainly we cannot determine R&D until we put all this information together to make a policy determination as to which way we are going. I seriously question research and development for the

25X1A

25X1A

SECRET

SECRET

25X1A sake of R&D alone without an identified goal or object behind it. As a second instance I used [] where we have gone ahead and developed a very expensive vehicle at some millions of dollars in cost but we have no definitive decision that we will use it and that we will engage in overflights of hostile territory where this vehicle reportedly would be of the most value.

My premise did evoke some discussion and I tried to set up a format by which this could be explored on an organized basis but there was little desire from the chair to have this structuralized so we can get at it in an organized way.

I do wish to explore in some depth the possibilities of R&D support to DD/S functions. We have done little in this area except in specific fields - Communications and Security audio countermeasures. There are perhaps many R&D aspects which would be of material value to the Agency as opposed to the expensive vehicles which may never fly and even if it flies we may never use it.

25X1A I have asked [] to prepare for me certain memoranda explaining the background of the approach to the DD/S offices to consider R&D application which I will first launch through a staff meeting with
25X1A [] present. He will prepare in draft the necessary papers and
I will ask [] to assist him in this regard.

DIARY NOTE

DD/S

15 July 1970

25X1

Alcoholism-Briefing of the Executive Director: A July 1970 Civil Service Commission Newsletter on Occupational Health dealt with the problem of drugs and alcoholism. The Executive Director noted this and asked for a briefing on this matter by the DD/S and Dr. Tietjen. We met with the Executive Director today and the report in substance was as follows.

Alcoholism is one of several problems in the medical field in the treatment of personnel-Agency or elsewhere . It is not much of a problem within the Agency and no special measures are required at this time to handle it. The problem is dealt with through diagnosis resulting from examinations, reports, etc.; preventative action through education, training courses, and briefings; and disposition through rehabilitation and administrative action or disability retirement. The only problem is that of early referral of a problem but this is not an issue at this time.

As regards drugs we have no drug problem among staff employees in the Agency. There is an increasing number of problems in dependent children of Agency employees which follows about the same pattern as is found in public life. Guidelines have been developed by Security, Personnel, and Medical in consideration of applicants for employment and this seems to work well. It may have to be revised as we have further experience in this field. Briefings are conducted of dependents going overseas as to the problems in the drug area. In Headquarters briefings of employees are conducted through the noon movie program and through training courses.

It was agreed that on both alcoholism and drugs we need not take any special action at this time.

DIARY NOTESDD/S15 July 1970

Non-Staff Annuity Plan: At the Deputies' Meeting today the non-staff annuity plan was considered. It was approved in principle subject to approval of regulatory issuances which would spell out the specific operation of the plan. The Executive Director felt that the proposal was loosely written and he was informed that this was a paper for approval in principle and was not the procedural document. Following approval in principle then the necessary regulatory governing regulations would be developed by which the plan would be operated. It was suggested that in the descriptive material for this program that models of annuity coverage be developed which could be presented to the prospective annuitants so they could make a proper selection of the most suitable plan. This would permit selection of variable annuities that would be available. It was further suggested that this again be submitted for a final review by representatives of the insurance companies and North American. In order to establish the administrative and legal basis it was agreed that there should be a regulation for each plan proposed. The DD/P suggested that for career agents the annuity program should be made mandatory. This was a suggestion which was not formally acted upon. The Director of Personnel advised that there were certain special cases that needed immediate action and should not be delayed pending the development of the formalized regulatory and administrative papers. It was agreed that these should be submitted to the Executive Director for immediate decision and action which would be covered by the actuarial program as it is developed.

~~SECRET~~DIARY NOTESDD/S10 July 1970

1. Mr. Scheffey-Bureau of Public Roads: I called Mr. Scheffey to advise him that I was sending him a picture of the Agency and the adjoining BPR property for his office. He was most appreciative.

Mr. Scheffey advised that he had met with the Administrator of the Bureau of Public Roads and that he had evidenced serious interests in the status of the BPR property and their desire to retain it for the Fairbanks Highway Research Station. I gathered that the Administrator had taken active steps with GSA or the Blue Ribbon Panel to express BPR's continuing interest. Mr. Scheffey indicated that they had scaled down their plans for exploitation of the property particularly eliminating such things as the network of roads that were to be used for testing purposes. These will be conducted in areas outside of the Washington Metropolitan area. Mr. Scheffey did not indicate the status of his A&E funds but I gathered that part of the consideration by the Administrator was to sponsor the acquisition of these funds for continued planning by BPR. Mr. Scheffey indicated he would keep me advised of developments.

25X1A 2. Space-Signal Analysis: Today I became aware of a proposal from [] (OCS) that suggested that the Signal Analysis activities of the Agency be consolidated into a single location where common use could be made of Signal Analysis computer facilities. Inherent in such a proposal would be some additional management features in the Signal Analysis management program. I first learned of this from John Clarke and following 25X1A this I called [] and this morning I talked to Don Steininger. To the above officers I indicated that with a major space rearrangements to take place in the near future as a result of obtaining the fourth floor of the 25X1A [] it might be possible to make available an appropriate space arrangement where Signal Analysis could be consolidated for central use facilities. Since I have no idea as to the parameters of this problem such as numbers of people, amounts of equipment, components involved, nearness to users of the Analysis, I asked [] Steininger to give me a rough estimate of these factors so that we could make a ballpark estimate as to whether this could be accomplished within our space 25X1A availability. I briefed [] and asked him to get in touch with 25X1A [] on this proposal. In a few days we should have such information to make a further analysis of this proposal.

~~SECRET~~

25X1

DIARY NOTES

DD/S

9 July 1970

25X1A 1. [] - Task Force
25X1A Survey: Since the survey by the Task Force would logically include the
25X1A space at [] it was felt appropriate that we should have a TSD
25X1A representative on the Force for that period of the survey. Accordingly
25X1A I called [] and asked him to nominate a representative to
25X1A [] for this purpose. [] was pleased to do so.

25X1A 2. Building Space Planning Moves: Today a meeting was held
25X1A with Messrs. Blake, [] Coffey, and the DD/S concerning the
25X1A proposed space moves to accommodate the requirements of OSP and SPA and
25X1A make full utilization of the [] fourth floor. After some discussion I
25X1A proposed the premise that we should replan these moves with the following
25X1A principles in mind:

25X1A a. We should plan to make maximum common use
25X1A of the facilities in [] as joint use could be
25X1A made of the Communications Center, the war room,
25X1A conference room, contractor interview room, and perhaps
25X1A a consolidation of the Support staffs of the various components
25X1A located in []

b. It was my idea that especially DD/S&T could be
given exclusive occupancy [] expanding SPA to its
needed requirement, expanding OSP for its requirement
and perhaps moving in even more units--in effect merging
some of these with ongoing OSA activities, the premise
being that OSP and SPA may seek to expand even beyond
present expected approved limits and if they do so it would
have to be at the expense of OSA in the [] or
they would have to move outside of the Washington Metro-
politan area. My philosophy is that these two organizations
which have a potential of expansion should not be located
in the Headquarters Building where that expansion capability
would be in competition with the hard-core ongoing functions
of the Agency. If the above move is practical, we could
consider moving and rearranging other outside units which
are now scattered into consolidated cores in the different
buildings. This would make for greater efficiency in units
that are scattered in Rosslyn which could be consolidated
in one building in Rosslyn.

~~SECRET~~
